The school \_\_\_\_\_ [1] age should be cut to 14, a chief inspector of schools in England has \_\_\_\_\_ [2] said.

Sir Chris Woodhead told the *Times* that this would give less academic students a better chance of learning a trade.

He said it was a "recipe for disaster" to force teenagers to study English and maths right up \_\_\_\_\_ [3] the age of 18.

Sir Chris said it was a mistake to make vocational education "quasi-academic" and added that the government had a "Utopian" view of school standards.

He said: "If a child at 14 has mastered basic literacy and numeracy, I \_\_\_\_\_ [4] very happy for that child to leave school and go into a combination of apprenticeship and \_\_\_\_\_ [5] education training and a practical, hands-on, craft-based training that takes them through into a job."

**54** : Quale delle seguenti parole è stata tolta al punto 1?

- A leave C leaving E to be  
B left D to leave leaving

**55** : Quale delle seguenti parole è stata tolta al punto 2?

Man, said Aristotle, is a social animal. This sociability requires peaceful congregation, and the history of mankind is mainly a movement through time of human collectivities that range from migrant tribal bands to large and complex civilizations. Survival has been due to the ability to create the means by which men in groups retain their unity and allegiance to one another.

Order was caused by the need and desire to survive the challenge of the environment. This orderly condition came to be called the "state", and the rules that maintained it, the "law". With time the partner to this tranquillity, man marched across the centuries of his evolution to the brink of exploring the boundaries of his own galaxy. Of all living organisms, only man has the capacity to interpret his own evolution and progress. As social life changed, the worth and rights of each member in the larger group, of which he was a part, increased.
